BioSystems

Author index

Volume 41 (1997)

Asselmeyer, T. **41**, 167

Barcia, R.M. **41**, 127
Belotelov, N.V. **41**, 99
Beyer, H.-G. **41**, 1
Borges, P.S.S. **41**, 127

Dyukova, T. **41**, 91

Ebeling, W. **41**, 167

Family, F. **41**, 153

Gunji, Y.-P. **41**, 179

Ito, K. **41**, 179

Khator, S.K. **41**, 127

Lao, K. **41**, 153

Maximychev, A.V. **41**, 195

Naka, T. **41**, 17

Ono, N. **41**, 191, 213

Pacheco, R.C.S. **41**, 127
Pattichis, C.S. **41**, 105
Pearce, T.C. **41**, 43, 69

Rambidi, N.G. **41**, 195
Robertson, B. **41**, 91

Sakamoto, N. **41**, 17
Schizas, C.N. **41**, 105
Schönfisch, B. **41**, 29
Schweitzer, F. **41**, 153
Shiba, K. **41**, 17

Takahara, Y. **41**, 191, 213

Vedushkin, M.A. **41**, 99

Watterson, J.G. **41**, 141
Weetall, H. **41**, 91

Yukhananov, R.Y. **41**, 99

Zaitsev, S.V. **41**, 99

JOURNAL OF Biotechnology

Subject index

Volume 41 (1997)

Abstinence; Drug dependence model; Opioids; Kolmogorov's approach; Hysteresis; Non-linear differential equations **41**, 99

Anisotropy; Cellular automata; Isotropy; Modeling with cellular automata **41**, 29

Artificial neural networks; Genetics-based machine learning; Diagnostic systems; Electromyography; Biosignal analysis **41**, 105

Artificial olfaction; Biological olfaction; Cellular processing; Biological computation **41**, 69

Artificial olfaction; Biological olfaction; Cellular processing; Biological computation **41**, 43

Bacteriorhodopsin; Film; Mutant; Tin oxide **41**, 91

Biological computation; Biological olfaction; Artificial olfaction; Cellular processing **41**, 69

Biological computation; Biological olfaction; Artificial olfaction; Cellular processing **41**, 43

Biological olfaction; Artificial olfaction; Cellular processing; Biological computation **41**, 69

Biological olfaction; Artificial olfaction; Cellular processing; Biological computation **41**, 43

Biomolecular computing; Information processing capabilities of excitable systems; Computational complexity **41**, 195

Biosignal analysis; Artificial neural networks; Genetics-based machine learning; Diagnostic systems; Electromyography **41**, 105

Building block hypothesis; Evolutionary algorithms; Multi-recombination **41**, 1

Causation; Consumers; Extinctions; Natural selection; Population; Suppliers; Trophic dynamics **41**, 213

Cellular automata; Anisotropy; Isotropy; Modeling with cellular automata **41**, 29

Cellular processing; Biological olfaction; Artificial olfaction; Biological computation **41**, 69

Cellular processing; Biological olfaction; Artificial olfaction; Biological computation **41**, 43

Communication; Disequilibrium; Ecosystems; Food webs; Measurement; Omnivores **41**, 191

Computational complexity; Information processing capabilities of excitable systems; Biomolecular computing **41**, 195

Computer simulation; Miniature endplate current; Two-dimensional space of axis-symmetrical disc; Transverse diffusion; Radial diffusion; Critical radius **41**, 17

Consumers; Causation; Extinctions; Natural selection; Population; Suppliers; Trophic dynamics **41**, 213

Critical radius; Miniature endplate current; Two-dimensional space of axis-symmetrical disc; Transverse diffusion; Radial diffusion; Computer simulation **41**, 17

Decision theory; Fuzzy expert systems; Game theory; Prisoner's dilemma; Simulation **41**, 127

Diagnostic systems; Artificial neural networks; Genetics-based machine learning; Electromyography; Biosignal analysis **41**, 105

Disequilibrium; Communication; Ecosystems; Food webs; Measurement; Omnivores **41**, 191

Drug dependence model; Abstinence; Opioids; Kolmogorov's approach; Hysteresis; Non-linear differential equations **41**, 99

Ecosystems; Communication; Disequilibrium; Food webs; Measurement; Omnivores **41**, 191

Edge of chaos; Fuzzy set; Self-organization; Measurement **41**, 179

Electromyography; Artificial neural networks; Genetics-based machine learning; Diagnostic systems; Biosignal analysis **41**, 105

Enzymic mechanism; Molecular machine; Protein structure; Random motion; Water structure **41**, 141

Evolutionary algorithms; Building block hypothesis; Multi-recombination **41**, 1

Evolutionary algorithms; Velocities of algorithms; Mixing of evolutionary algorithms **41**, 167

Extinctions; Causation; Consumers; Natural selection; Population; Suppliers; Trophic dynamics **41**, 213

Film; Bacteriorhodopsin; Mutant; Tin oxide **41**, 91

Food webs; Communication; Disequilibrium; Ecosystems; Measurement; Omnivores **41**, 191

Foraging patters; Trail formation; Self-organizing systems **41**, 153

Fuzzy expert systems; Decision theory; Game theory; Prisoner's dilemma; Simulation **41**, 127

Fuzzy set; Self-organization; Measurement; Edge of chaos **41**, 179

Game theory; Decision theory; Fuzzy expert systems; Prisoner's dilemma; Simulation **41**, 127

Genetics-based machine learning; Artificial neural networks; Diagnostic systems; Electromyography; Biosignal analysis **41**, 105

Hysteresis; Drug dependence model; Abstinence; Opioids; Kolmogorov's approach; Non-linear differential equations **41**, 99

Information processing capabilities of excitable systems; Biomolecular computing; Computational complexity **41**, 195

Isotropy; Cellular automata; Anisotropy; Modeling with cellular automata **41**, 29

Kolmogorov's approach; Drug dependence model; Abstinence; Opioids; Hysteresis; Non-linear differential equations **41**, 99

Measurement; Communication; Disequilibrium; Ecosystems; Food webs; Omnivores **41**, 191

Measurement; Fuzzy set; Self-organization; Edge of chaos **41**, 179

Miniature endplate current; Two-dimensional space of axis-symmetrical disc; Transverse diffusion; Radial diffusion; Critical radius; Computer simulation **41**, 17

Mixing of evolutionary algorithms; Evolutionary algorithms; Velocities of algorithms **41**, 167

Modeling with cellular automata; Cellular automata; Anisotropy; Isotropy **41**, 29

Molecular machine; Enzymic mechanism; Protein structure; Random motion; Water structure **41**, 141

Multi-recombination; Building block hypothesis; Evolutionary algorithms **41**, 1

Mutant; Bacteriorhodopsin; Film; Tin oxide **41**, 91

Natural selection; Causation; Consumers; Extinctions; Population; Suppliers; Trophic dynamics **41**, 213

Non-linear differential equations; Drug dependence model; Abstinence; Opioids; Kolmogorov's approach; Hysteresis **41**, 99

Omnivores; Communication; Disequilibrium; Ecosystems; Food webs; Measurement **41**, 191

Opioids; Drug dependence model; Abstinence; Kolmogorov's approach; Hysteresis; Non-linear differential equations **41**, 99

Population; Causation; Consumers; Extinctions; Natural selection; Suppliers; Trophic dynamics **41**, 213

Prisoner's dilemma; Decision theory; Fuzzy expert systems; Game theory; Simulation **41**, 127

Protein structure; Enzymic mechanism; Molecular machine; Random motion; Water structure **41**, 141

Radial diffusion; Miniature endplate current; Two-dimensional space of axis-symmetrical disc; Transverse diffusion; Critical radius; Computer simulation **41**, 17

Random motion; Enzymic mechanism; Molecular machine; Protein structure; Water structure **41**, 141

Self-organization; Fuzzy set; Measurement; Edge of chaos **41**, 179

Self-organizing systems; Trail formation; Foraging patters **41**, 153

Simulation; Decision theory; Fuzzy expert systems; Game theory; Prisoner's dilemma **41**, 127

Suppliers; Causation; Consumers; Extinctions; Natural selection; Population; Trophic dynamics **41**, 213

Tin oxide; Bacteriorhodopsin; Film; Mutant **41**, 91

Trail formation; Foraging patters; Self-organizing systems **41**, 153

Transverse diffusion; Miniature endplate current; Two-dimensional space of axis-symmetrical disc; Radial diffusion; Critical radius; Computer simulation **41**, 17

Trophic dynamics; Causation; Consumers; Extinctions; Natural selection; Population; Suppliers **41**, 213

Two-dimensional space of axis-symmetrical disc; Miniature endplate current; Transverse diffusion; Radial diffusion; Critical radius; Computer simulation **41**, 17

Velocities of algorithms; Evolutionary algorithms; Mixing of evolutionary algorithms **41**, 167

Water structure; Enzymic mechanism; Molecular machine; Protein structure; Random motion **41**, 141
